Fair Value Gaps

Fair value gaps (FVG) are a three-candlestick pattern where the high/low of the candle(1) does not overlap the low/high of candle(3).

The low of candle(1) does not overlap with the high of candle(3).

SIBI & BISI

SIBI: Sellside imbalance buyside inefficiency

This is a **bearish** FVG.

Price offered sellside and made an imbalance. This leaves buyside inefficient.

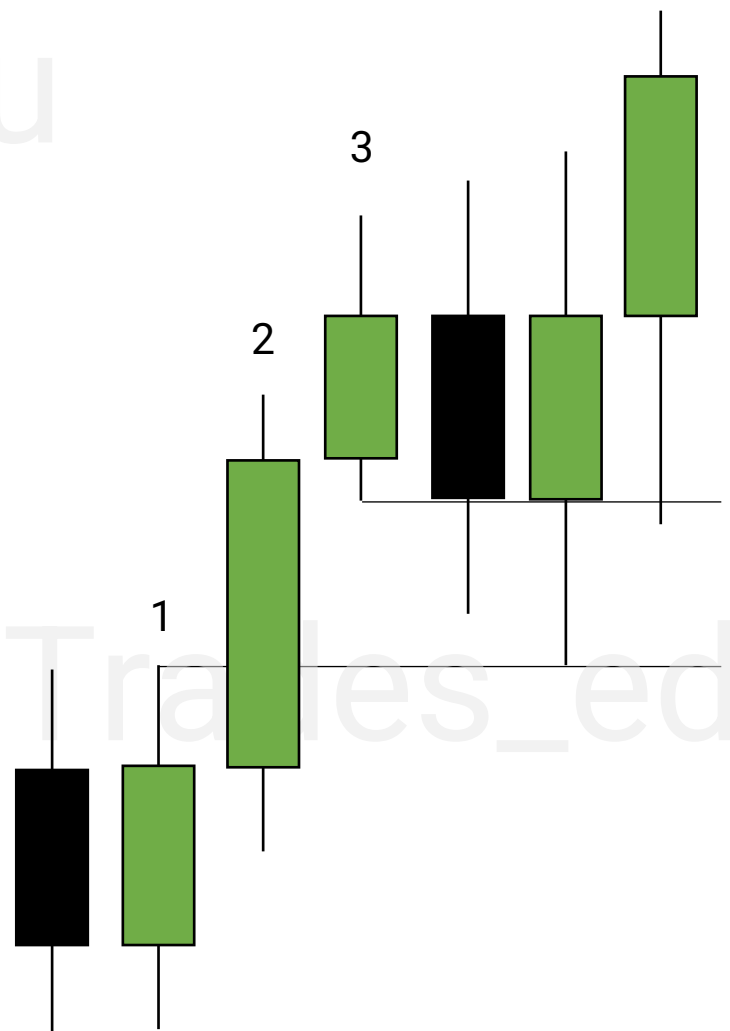

Candle(1) low does not overlap with Candle(3) high.

BISI: Buyside imbalance sellside inefficiency

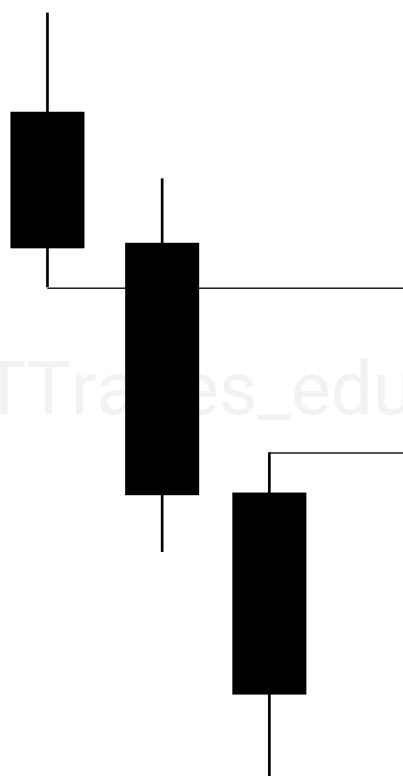

This is a **bullish** FVG.

Price offered buyside and made an imbalance. This leaves sellside inefficient.

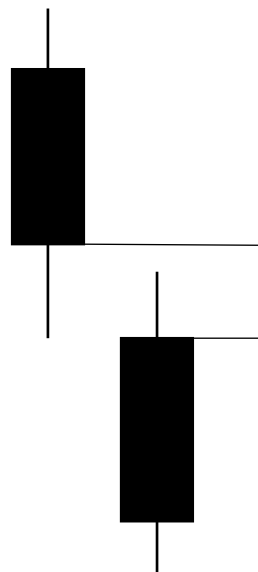

Candle(1) high does not overlap with Candle(3) low.
