Bearish Breaker Block

The chart displays a sequence of candlesticks representing price movement. The pattern begins with a series of candles showing an upward trend. A specific candle is identified as the 'High' with a downward-pointing orange triangle. Following this, the price moves down, creating a 'Low' marked with an upward-pointing orange triangle. The price then rises again, forming a 'Higher High' marked with a downward-pointing orange triangle. This final candle is a black candlestick, indicating a bearish close, which represents the Bearish Breaker Block. The chart uses green for bullish candles and black for bearish candles. A dashed line connects the 'High' to the 'Higher High' to show the price progression.
